

# BREAKING THE MOLD

**WORKERB**  
POWER PACK

## REVOLUTIONIZING PORTABLE SEWING

The WorkerB Power Pack is an **innovative portable motor system** never seen before in the sewing machine industry — and it's found only at Sailrite. The WorkerB delivers **unparalleled power and slow speed control**. And the best part? All this speed control and power are found in a portable motor.

## Is the WorkerB a Rebranded Motor System?

Definitely not. The WorkerB motor system is a Sailrite-exclusive design two years in the making. We partnered with a well-known power tool manufacturer to engineer the proprietary circuitry. Our mission was to ensure each system met our standards for speed, power and portability.

## Will the WorkerB Power Pack Work on My Ultrafeed?

An important part of our design phase was making sure the WorkerB would be compatible with every Ultrafeed Sewing Machine — no matter how long ago you purchased yours. If you own a Sailrite Ultrafeed, the WorkerB Power Pack will work on your machine.

## Why Should I Upgrade My Motor to the WorkerB?

The unrivaled power of the WorkerB motor system is an industry game changer. The WorkerB offers the best of both worlds: unbeatable power with the portability you need. If you've ever struggled with controlling your stitch speed or felt like you were sewing too fast, you need the WorkerB. If your sewing machine has ever struggled through dense assemblies or stopped working when it couldn't handle a project, you need the WorkerB.

## How Does the WorkerB Compare to Other Portable Motors?

- Power:** The most powerful motor found on portable sewing machines, the WorkerB delivers 2.5 times the power of other portable motors.
- Speed Control:** Easily adjust the maximum sewing speed with the dial on the control box.
- Power Boosting Technology:** When the machine encounters resistance from changes in fabric thickness or density, the control box provides a boost in torque to power through.
- Designed With Use in Mind:**
  - Integrated Light Outlet — conveniently plug a sewing machine light right into the control box.
  - On/Off Switch — shut the motor off with the machine plugged in.
  - Balance Wheel — the ergonomic hand grip makes it easier to operate the machine by hand.
- Foot Control Pedal:** A large range of pedal movement provides unrivaled slow speed acceleration.
