

Sailrite® Drill Hole Cutter Set Centering Template

We designed this template to pair with the Sailrite Drill Hole Cutter Set. Use it to align and center holes around your placement mark before punching the fabric.

How to Use: Cut out the vertical section of the template that corresponds with the hole cutter size you're using. Punch out the hole size on the vertical strip. Use this "paper ruler" to align the template with the fabric edge at your desired distance. Keep the paper in place and cut your hole. Repeat until you've cut all your desired fabric holes.
