

## Spray Adhesives Comparison Chart

Use this handy chart to determine which aerosol spray adhesive should be used for your project. Whether you're gluing headliner fabric to your boat's bulkhead, adhering pieces of foam together or doing automotive trim work, we've got a spray adhesive for your DIY. Be sure to read our blog "Choosing the Right Spray Adhesive" (#300406XHT) for more information about our spray adhesive products, their characteristics and uses.

\*Fabric bleed-through and fabric stretch factor is a concern. Will require user testing.

\*\*Must be fabric-backed vinyl or all spray adhesives will fail.
